loaned out overnight or for the  
weekend 2 hours before library's  
closing time).
- THESES :Call Number:OPINNÄYTTEET  
(Theses made at Helsinki Metropolia  
UAS)

**TIPS FOR SEARCHING THE MATERIAL:**

All the library materials are placed in the shelf into subject classes. Classification is divided into ten main classes (0-9) and their subordinate classes. Within the class material is arranged by the main term, which is either author's last name or book's title (for example in case of edited books).

When you are searching for material in MetCat database, please remember to check work's shelf class and whether you find it in the shelf by the author or title.

The shelf class is found in MetCat database in Holdings view for selected title (for example 36 GOLIGHTLEY).
