METROPOLIA MASTER'S - CERTIFIED DEGREE FOR YOUR PROFESSIONAL CAREER

Business Informatics

Degree: Master of Business Administration, 90 ECTS credits
Degree: Master of Engineering, 60 ECTS credits

- Feel for upgrading your degree from a Bachelor's to a Master's?
- Current or future job calling for a strong combination of business management and modern IT systems?
- Desire to join a learning community formed by international students, qualified lecturers with strong business background, as well as innovative business companies operating in the Metropolitan area of Finland?

If your answer is 'yes' to one or more of the above questions, our Master's Degree Programme in Business Informatics is for you!

Business Informatics, a fairly new concept, is growing in importance. Business professionals can build their expertise through improved information management and better use of latest business intelligence.

The programme offers deeper insight into business management areas such as financial analysis, leadership, marketing or logistics, each linked to corresponding IT systems. Thanks to a multicultural student group and educators from diverse backgrounds, the scope of studies is very international. Students usually complete their degree in 1.5 - 2 years.

One of the most rewarding parts of master studies is a demanding research and development project implemented in/for real business life, typically for the master student's work organization. The process and its results are reported in a Master's Thesis, 30 ECTS of extent.

The Master’s Degree Programme in Business Informatics is designed for the alumni of Helsinki Metropolia UAS and other institutions of higher education. In addition to a bachelor degree in business, engineering or related field, applicants must have at least three years of relevant work experience after their graduation. Good English skills are naturally a must.

We welcome applications from highly motivated individuals who are willing to commit themselves to a demanding, yet rewarding learning experience.

Please check our admissions site and send in your application!

Contact sessions (typically every second Friday) take place on our Bulevardi campus during the 1st semester, and thereafter on our Myyrmäki campus, Leiritie 1, 01600 Vantaa. Various forms of e-learning will also be applied.

Further information: Ms Erja Turunen, Head of Degree Programme, e-mail erja.turunen@metropolia.fi, tel. +358 (0)40 737 8566.
Enhance your international competence during your Master’s studies!

We have several options for our students to enhance their international competence, one of the most exciting ones being a short term exchange opportunity to Berlin. A study trip of 3-4 days in Berlin is integrated in the course “Innovation & Renewal” for the purpose of learning the topic area by visiting companies and organisations which stand out as innovative and exemplary cases. A joint learning session is organised with the partner university and its Master’s students. Cultural activities add to the learning experience. Come and strengthen your connections and networks with us!
