

Finland tops in innovation and education

Finland is the most innovative country in the world, according to the Global Competitiveness Report 2014-2015 of the World Economic Forum (WEF).

As reported by the inaugural Inclusive Growth and Development Report 2015, Finland's education and skills, along with its asset building and entrepreneurship, are the best in the world according to the latest report from the World Economic Forum.

The success of Finnish education is built on highly qualified teachers at all levels of education. Over the past years the Finnish education system and teacher education has gained international recognition through top placement in the PISA and PIAAC surveys.

Increased competence, better health

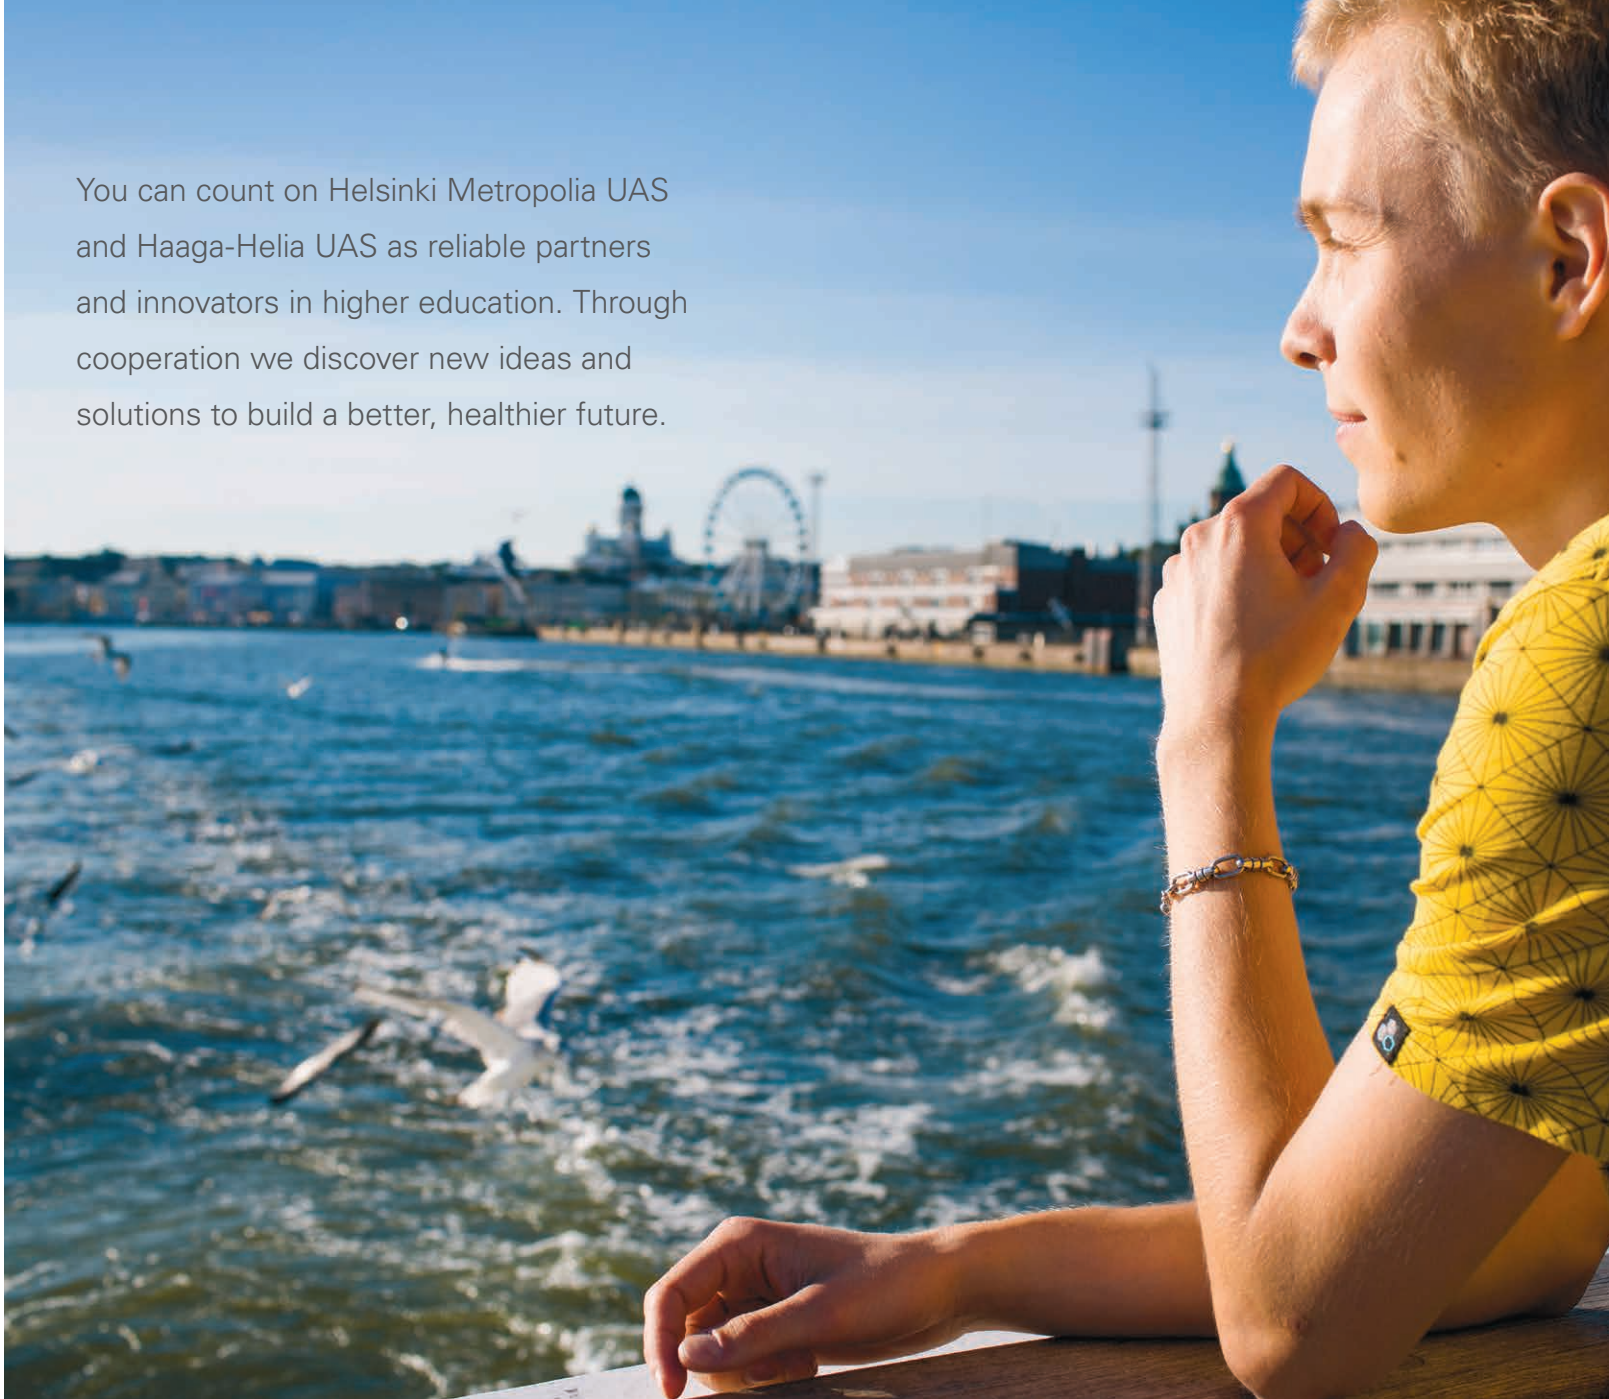

Our services

- Customized Education and Training
- Consultation Services
- Research, Development and Innovation Services

Helsinki Metropolia UAS and Haaga-Helia UAS collaborate in education export and our resources are assembled with a strong knowledge-base. By combining Haaga-Helia's high-quality vocational teacher education and Metropolia's multidisciplinary expertise and strong competence as a health care professionals' educator, we offer:

You can count on Helsinki Metropolia UAS and Haaga-Helia UAS as reliable partners and innovators in higher education. Through cooperation we discover new ideas and solutions to build a better, healthier future.

Our target group and potential partners

Health care teachers, health care professionals and managers.

Upon request, we design modules to support leaders and managers to execute the required change.

Why us?

Haaga-Helia School of Vocational Teacher Education is an active exporter of vocational pedagogy in many international markets – China, Latin America, Gulf Area, Africa. Haaga-Helia has also hosted successfully many international groups in Finland combining pedagogical theory and methods with school visits and excursions. Haaga-Helia's approach is a future-oriented understanding of professional pedagogy and the ability to construct working-life relevant education. Everything is based on the learner-centered idealogy. Programs are tailored and planned in collaboration with the customer.

Metropolia's innovations in health technology such as VitalSense, a physiological monitoring system, MobiDent, a mobile application to promote elderly people's oral health, and innovations in game pedagogy, have caught the interest of potential international customers in North America, Asia, and Europe. In addition to publications and state-of-the-art simulation environments, Metropolia's expertise in simulation pedagogy manifests itself in the custom-designed workshops that have taken place across Europe and Asia.
